

I personally find it sad that when a good thing is presented to the American public that makes the life style more enjoyable, someone has to come along and try to screw it up. I spend a lot of time in my vehicle and find XM radio a blessing to have. It is no different than any other radio. If you want to get rid of something, get rid of Howard Stern and his crap that he puts on the radio. It isn't informative and is total nonsense, and yet he still remains on radio and now has his own TV show. Give me a break.....
